"Ask Rotherholme"

Q: There are so many toothpastes to choose from; how do I know which one to use?

A: When purchasing a toothpaste for yourself, select one that contains fluoride. Fluoride containing toothpastes have been shown to prevent cavities.

Q: Can I still get my teeth straightened as I am over 20 years of age?

A: Yes you can! It is **never** to late to get the smile you've always dreamed of. We offer two different cosmetic straightening systems in the practice which may be suitable for yourself. **Free consultations** are available with our smile advisor Nickey to discuss your options.

In the meantime have a look at the information on our website **www.rotherholmedentalpractice.co.uk**

"Crazy happy, can't stop smiling, Thank You all so much. I can't wait to show off my new smile to everybody"

- Abigail Deakin
